

# A Foundation in Quality Care.

## We're open to serve our community's ongoing childcare needs.

It is our intention to, wherever possible, ensure an uninterrupted continuation of care. We believe it's critical that families who need our support continue to get it.

In order for essential workers to be out keeping us safe or ensuring we're able to buy food for our families, or caring for the sick, they need to know their children are cared for in a safe, supportive environment. As a result, we have decided to keep our centers open and functioning during this pandemic.

We're working with our school district partners to reopen centers that needed to close as part of a broader campus closures. Our growing list of open centers can be found at: [www.catalystkids.org/contact/covid-19-updates/](http://www.catalystkids.org/contact/covid-19-updates/).

### We are taking extra safety and sanitation measures by...

- Engaging in aggressive cleaning.
- Increasing the frequency of disinfecting touched surfaces and using disposable products.
- Increasing the frequency of hand washing for staff, parents and children.
- Continuing our daily health checks and separating sick children from others until they can go home.
- Continuously working with our staff to ensure they remain healthy and adjusting staffing needs where necessary.

### Social Distancing

We're also ensuring social distancing in all our centers and ensuring our capacity numbers are in line with Centers for Disease Control and state recommended guidelines.

### Our Commitment to you

In a time of crisis, we are committed to be there to support our communities. Working together, we'll get through this stronger than ever.
