

At Home Material List

Young Infants – birth to 6 months old

Babies love to learn about the people and world around them by using their five senses. They will reach for things, turn their heads to sounds, put things in their mouths and watch people around them. Find toys around the house that your baby can safely reach, hold, suck on, make noises with and listen to.

Soft textured books

For reading, touching and looking at colorful pictures

Grasping toys

For grabbing and shaking

Balls
