Best Potty Training Books

You and your child are about to reach a major milestone together: It’s time to start potty training.

Although every child reaches this milestone at their own pace, most toddlers are ready to try ditching the diapers sometime between 2 and 3 1/2 years old. Signs that your child is ready to be potty trained include more regular bowel movements, telling you when they’re peeing or pooping and asking for their dirty diapers to be changed.

Talking about using the bathroom and playing up the positives (“Wearing underwear is exciting!”) may help your little one embrace this big transition. Books can also help you get the conversation started, teach your toddler the basics and get him excited about the idea of trying the potty on his own.

Best of all, there’s a pick out there for every family. Here’s a look at our favorite potty training books, from multi-generational classics to push-the-button sound books.
